

Handy tips for using **RETRO MAGAZINE** Photoshop Actions

For using in PS CC 2020 or higher

Handy tip no.1

Adjust the opacity of your new effects layer - to tone down the effect if you find the effect is too strong.

Handy tip no.2

Document size is recommended to be at 3500 x 2480 or A4 size.
You can always scale down your finished image to a smaller size if you need it to be smaller.

If your document is too small - the effects will be exaggerated.
And vice versa - if your document is too large - the effects will be smaller.

Handy tip no.3

Make sure all photographs/images are cropped to fit the canvas,
if you have a large image which stretches way beyond the canvas,
the action will be slower, and might even crash your machine.

Handy tip no.4

Don't name any layers 'New' - this might interfere with the action.
