

Dear font lover,

Thank you so much for buying my font !

Here is a quick tutorial on how to install it, so that you could access to the extra features such as ligatures and alternate glyphs.

- 1 First, if you have installed a personal free version of the font on your system, uninstall and delete it, you don't need it anymore.
- 2 If you're working with Adobe Illustrator, Indesign, or Photoshop CC 2015, you'll just need to install the OTF file. Go to Text > Glyphs. In Photoshop CC2015 go to Type > Panels > Glyphs panel or Window > Glyphs. There you'll find the complete set for you to play with.
- 3 If you're using any other program such as Microsoft Word, Publisher, Pages, Pixelmator, etc... you'll need to install both TTF files (font file + alternates file). Just write your text using «Magnolia Sky», and pick up with «Magnolia Sky Alternates» the alternate you want. To help, here is the glyph table :

TTF	ALT	TTF	ALT	TTF	ALT	TTF	ALT	TTF	ALT
